EP REPORT: RELAUNCH FREIGHT TRANSPORT AFTER COVID-19

The European Parliament's Research Service issued this month a report on the repercussions of the COVID-19 pandemic on freight transport. It provides an overview of the measures taken at EU and national level to support the free flow of goods, predicts the emerging developments and trends of the industry and proposes policy recommendations to address the challenges emerging from the crisis.

CONTAINER RELIABILITY HITS A NEW RECORD LOW

Maritime analyst Sea Intelligence published on yesterday the latest issue of the Global Liner Performance report, with schedule reliability figures up to December 2021. The report shows that schedule reliability dropped again, this time by -1.2 percentage points on month-to-month basis to 32.0%; the lowest ever global schedule reliability since Sea-Intelligence started the measurement in 2011.

STRONG DECEMBER PERFORMANCE CONTRIBUTES TO YEAR-ON-YEAR DEMAND GROWTH BY 18.7%

On 25 January, the International Air Transport Association (IATA) released data for global air freight markets showing that full-year demand for air cargo increased by 6.9% in 2021, compared to 2019 (pre-COVID levels) and 18.7% compared to 2020 following a strong performance in December 2021. This was the second biggest improvement in year-on-year demand since IATA started to monitor cargo performance in 1990 (behind 2010's 20.6% gain), outpacing the 9.8% rise in global goods trade by 8.9 percentage points.
