1	AMIT spol.s r.o.	Tomáš Jiříčka Chief Sales Officer	<p>The AMIT company is one of the most important players in the area of development and manufacture of control systems and electronics for transport, particularly for railway and rolling stock, as well as electronics for industrial and building automation. Our assets are based primarily on own know-how and development, advanced manufacture, a professional approach to customers, close involvement with state-of-the-art manufacturing technology and our unrivalled superior technical support. Our high requirements for the quality of production and resulting products, supported by over 20 years of practical experience, guarantee successful implementations even for the most demanding customers and contractors.</p> <p>We are offering for Transportation Segment: information systems for passengers, IP surveillance and audio systems, TCN communication, communication infrastructure and on-board control systems, which meets general (EN) and technical (UIC) standards. We are offering for Automation Segment: electronics and systems of our own know-how in the sphere of design and fine-tuning program tools which support a speedy and reliable launch of automation devices.</p>	<p>Producers of rolling stock vehicles (locomotives, wagons, trams), Operators in railway and public transport segment, Integrators.</p> <p>Engineering companies in industrial, chemical and food industry which are designing technology processes and technology lines, engineering companies designing building management.</p>	www.amit.cz
2	CONROP	Karel Pavlíček CEO	<p>The scope of business activity of CONROP Group is production, development and sale of flexible packaging (called BIG BAGS), designed for packaging, handling and transport of particularly bulk and liquid materials. Company is certified according to ISO 9001:2009, ISO 22000 and FSSC 22000. The construction of bags according to ISO 21898 standards. Manufacturing plants of the company are deployed in Czech Republic and Slovakia, the headquarters is located in Bolatice in the Czech Republic. CONROP, s.r.o. operates on a worldwide scale with deliveries to more than 20 countries. The share of export makes over 82% of the total sales.</p>	<ul style="list-style-type: none"> • CONROP Group plans to open production plant in Turkey and therefore we looking for local sub-suppliers, which are able to offer operators for production of our products. Specifically we looking for experienced sewers. • In addition, we looking for suppliers of polypropylene woven fabrics. • We would like get contacts to local authorities that can help us get investment support when opening a production plant 	www.conrop.com
3	Export Guarantee and Insurance Corporation	Marek Dlouhý Vice chairman of the Board of Directors, Deputy CEO, Insurance Section	<p>EGAP is a credit insurance corporation insuring export credits connected with exports of goods and services from the Czech Republic against political and commercial risks uninsurable by commercial insurance.</p> <p>EGAP insures in particular bank loans due in over 2 years, foreign investment and bank guarantee, intended to finance export of energy, machinery and technological systems, investment projects, transport constructions etc from the Czech Republic. EGAP is one of a basic part of a government policy to support the Czech export.</p>		www.egap.cz
4	EGT Express CZ s.r.o.	Petr Mikel Sales & Marketing Director	<p>We are a Czech company, founded in 1995 and 100% owned by the Czech management. Our main effort is to link the EU countries with Middle East, Caucasus countries, Central Asia and the Balkans. We specialize in LTL and FTL road transport. We can provide you with ADR and express shipments, transport of shipment in the temperature regime or oversized and overweight transport. Our full service includes also air services, sea freight, rail transport, customs services and storage. EGT Express CZ prepares solutions tailored to the needs of even the most demanding clients and offers online tracking system. We operate a regular weekly groupage line from our warehouse in Velká Bystřice to Mongolian Ulaanbaatar. We take care of your consignment in a responsible and flexible manner and with maximum professional commitment from pick-up until delivery to the final destination.</p>	Clients, business partners	www.egtexpress.com

5	FERRIT s.r.o.	Juraj Švorc Head of Turkish Division	<p>Ferrit is a modern European company with a worldwide presence. For almost three decades Ferrit has been developing, manufacturing and servicing a complete range of machinery and equipment dedicated for transportation in mines. Experience, R&D, manufacturing facilities, use of latest technologies, quality control and last but not least the global active sales team are turning Ferrit into a strong and dynamically growing company.</p> <p>Core business is a monorail transport system (diesel and battery versions) with focus on men and material transport for UG mainly coal mines, where our machines can be operated at inclinations of up to 35° and carry loads weighing up to 44tons. Besides that, we specialize in machines that are used in the environment of ore and diamond mines, tunneling field etc.:</p> <p>Our R&D department is preparing autonomous operation of mining machines, developing our own lithium traction battery, preparing the concept of hydrogen propulsion etc.</p> <p>Pls visit our website www.ferrit.cz for more information.</p>		www.ferrit.cz
6	I.B.C. Praha	Mr. Jaroslav Hanousek Managing Director	<p>Certified manufacturer and supplier of industrial valves, especially designed for employment in power industry, including nuclear power stations, heat, oil, gas, chemical and other industries. The valves are designed, manufactured, and tested according to EN, DIN, API and GOST Standards. The company has an implemented and certified quality management system according to ISO 9001, ISO 14001, ISO 18000, ISO 3834-2, MODUL H.</p> <p>The production program includes particularly ball valves including TOP Entry, globe valves, gate valves, swing check valves, butterfly valves, lift check valves and strainers, as well as completely special valves developed for the most demanding industrial applications.</p>	<p>Customers who buy industrial fittings, engineering companies that use industrial fittings in their projects, EPC contractors. Also distributors who offer industrial fittings for customers in various areas of industry.</p> <p>Yatagan Termik Enerji, Seref Kutlu Tüpras, Cumhuri Özyavru Etimaden, Ibrahim Durukan Otkonsas, Kutay S. Göksu CEÜAS Seyitömer Elektrik Üretim, Erol Yılmaz GAMA Industrial Plants, Levent Besen</p>	www.ibcp Praha.cz
7	LANEX	Karel Pavlicek CTO, member of the board	<p>LANEX is a manufacturing and business company producing fibres, bands, strings, cords and ropes from synthetic materials for the most demanding uses in various segments of the market.</p> <p>The company has its own world-class. brand of dynamic ropes for climbing or canyoning: TENDON.</p> <p>As for water sports the LANEX Yachting brand has earned good reputation, not only among the racing yachtsmen. The LANEX ropes are used in various industries: extremely strong ropes in the ship building and marine industry, carrier ropes for paper-making machines, strength ropes for installing electrical lines and cable transport construction, high-strength loops for lifting loads, products for agricultural use etc. The TENDON work positioning product portfolio is supplemented with certified PPE. The proof of quality is the close cooperation with fire-fighters, rescuers, police and armies all over the world. A wide range of ropes, twines and cords is designed for craftsmen, gardeners and other hobbyists.</p>	<ul style="list-style-type: none"> • To meet potential customers who use ropes. Marine ropes, Dynamic ropes for climbing, Static ropes for work in heights and safety work, Yachting ropes, special high strength ropes for lifting, ... • In addition, we looking for suppliers of polypropylene granulate, high tensile polyamide yarn, polyester yarn 	www.lanex.cz

12	ŠKODA TRANSPORTATION, a.s.	Zdeněk Sváta President for CE Region Member of the Board	Škoda Transportation Group is one of the major European companies in the field of transport engineering. Thanks to high investments in our own research and development, we have a production portfolio of modern means of transport that meet the latest safety standards. Our main products include in particular low-floor trams, trolleybuses, electric locomotives, suburban train units, electric motors and complete drives for transport systems. The Group consistently employs more than 5 500 people. Modern products with the Škoda logo are created in completely new premises, which we built a few years ago in the traditional Pilsen area. The cost of its construction exceeded two billion crowns.		www.skodagroup.com
13	Šroubárna Kyjov, spol. s.r.o.	Jan Karczmazyk Business Manager	Šroubárna Kyjov was established in 1950 and since then we have gained the position of a notable producer of fasteners. In 1991 the company was privatized and started moving its orientation to international markets which is shown by our 80% Export Share. The most important part of the activity is the production of screw spikes, clamp and structural bolts, nuts and components for special use (anchor bolts, threaded rods). Approximately one-fifth share represent forgings for the automotive industry and bearing ring forgings as well as precisely machined bearing rings for bearing production.	Clients	www.sroubk.cz
14	SVCS Process Innovation	Jaroslav Dolák CEO	SVCS is a manufacturer of thermal reactor (furnaces) that are used either for production or R&D of the "semiconductors". We would like to approach R&D institutes established by industries, universities or academic bodies. Semiconductor components are diode, transistor, integrated circuits ("chips"), processor, memory, as well as photovoltaic solar cell. Nowadays, except "semiconductor" the popular expressions in our target area MEMS, nanomaterials and nanotechnologies. Sensors, thin films etc. These laboratories are usually built with extreme requirements for high purity environment, so called "clean rooms". Extremely high purity gases and liquids are used in the thermal reactors, therefore the additional part of our production are distribution systems for UHP gases and liquids.	Potential customers from the area of Turkish R&D institutes (universities, military research,...). Namely: Oyku Seis TESTONE TEKNOLOJİ ÇÖZÜMLERİ SAN. VE TİC. A.Ş. Hamidiye Mah. 15	SVÚM a.s.	Ivo Hain CEO	SVÚM a.s. is one of the most important research organizations in the Czech Republic and specializes in basic and applied research and development of metallic materials (ferrous and non-ferrous metals), plastics and composites. It has accredited laboratories and test rooms with an extensive focus on the aerospace, automotive, railway, energy and engineering industries. SVÚM a.s. collaborates on research projects in the Czech Republic and abroad within the calls of the ministries of the Czech Republic, TACR and international projects of the European Union (COST, EUREKA, EUROSTARS, HORIZON 2020, etc.). Laboratories are accredited by the CAI (Czech Accreditation Institute) according to CSN EN ISO/IEC Standard 17025 (European/worldwide validity) tests of mechanical properties (static, impact and fatigue), cooperation with the Notified Body in the field of tests according to EN ISO / IEC 17025; EN ISO / IEC 17065; EN ISO / IEC 17021. SVÚM a.s. is located in the Science and Technology Park SVÚM a.s. in Tovární 2053, in Čelákovice.	1) We are looking for a company – producer of railway components (wheels, axles, springs, screw couplings, draw gears, hooks) 2) The company is a producer and developer of self-lubricating bearing foil METALOPLAST® and METALOFLO® for bearings and bearing housings for the automotive industry. Currently, more than 70% of the world's automotive manufacturers use bushings METALOPLAST on hinges and hoods. METALOPLAST® is a universal bearing material having a low coefficient of friction, high wear resistance, high-capacity and low maintenance, ease of hand and machine process ability and other advantages. The company looking for partners in the Turkey market. Namely: Telsanat www.telsanatyay.com.tr/ Estetik yay www.anadoluraylisistemler.org/estetik-yay-firmasi-73 Kardemir www.kardemir.com Kanca www.kanca.com FMC www.fmc.com.tr	www.svum.cz
16	The Institute for Nanomaterials, Advanced Technologies and Innovation, Technical University of Liberec	Adam Blazek Industry Relations Director	We provide research and development services in nanomaterials, engineering and software solutions. We have experienced teams and unique technical equipment and thanks to that we can design the best solutions. We do analysis, develop and manufacture prototypes, perform tests, trials and measurements at different stages of development. We mostly collaborate on innovations with companies and institutions. Thanks to the international project LIFEPOPWAT we developed the Wetland+ technology. The technology is based on the Wetland+® wetland system, which is an efficient, low-cost and low-maintenance method of landfill water treatment compared to conventional methods. The method is based on the flow of water through several reactive zones and a wetland as the final treatment unit. In addition, the system can be powered by solar batteries and can therefore be used even in remote locations without electricity. LIFEPOPWAT will provide technology to mitigate the pollution generated by HCH megasites using Wetland+ technology looking to replicate the experience for sites across the EU and globally. The developed technology can be applied in large sites as well as to smaller sites.	We are looking for partners from industry and state organizations who are looking for solutions to environmental problems with disposal of contaminated areas in order to minimize risks to water from HCH megasites. We are open to any kind of cooperation, including solving the problem in the form of European grant projects.	https://cxl.tul.cz/en/
