

**Saudi Railway Organization
Contracts Department – Office**

Sub: Circulation of fine Imposition

Circulation

To: Marine agents and custom clearance offices in Riyadh Dry Port

Sirs,

You know that some owners of containers which brought to Riyadh's dry port from outside the country through King Abdulaziz sea port in Dammam, do not observe to put their goods inside the container on ballets, therefore they breach the international observed instructions in this regards, which aims to keep or care for goods' safety while transporting and handling them for custom viewing, then get them back, in addition to decreasing of effort and required time for that. Also not putting goods on ballets expose them to damage while transportation these containers from origin country to merchants' warehouses, then it is very difficult to specify losses about these damages when discovering them during unloading goods in their warehouses.

Therefore, organization request from you to inform your clients (goods owners) of importance of putting their goods on ballets as per required, and in case of breach, they will punish by SR 1000 fine for each 20 feet container , and that as per ports' system, and this procedure should be applied after three months of this circulation date.

For Importance .

With thanks & Best regards,
