

# Register for the Freight-Pay Introduction Webinar

We are delighted to introduce you to Freight-Pay, a custom online payment platform developed by PayCargo for FIATA members. Freight-Pay was recently launched to simplify the freight forwarder's day-to-day business, by allowing you to send and receive money to and from other members who have also joined the platform. With Freight-Pay, you will benefit from a reduced transaction fee, flexibility of payment, and best-in-class security features. You will also be able to pay your FIATA membership fees through the platform.

Existing methods of international payments are slow, expensive, and often

unavailable to many businesses; Freight-Pay has been specifically designed to address and resolve these challenges for the FIATA freight forwarding community, by facilitating international partnerships and significantly reducing the cost of transactions.

FIATA members can register for free and create a pre-paid account, from which they can send and receive money to and from FIATA members. You will get a reduced transaction fee of \$2, as well as be able to make payments to non-FIATA North American based vendors using the PayCargo system – with a regular transaction fee of \$9.5.

Additional benefits include:

- Reconciliation of payments made easy thanks to the transaction reports
- \$0 cost to receive payments
- Online payments flexibility and possibility to group several invoices into a single transaction
- Funds are applied immediately when paid by another FIATA member
